

Dear Resident,

Mount Pleasant Design Changes

We hope this letter finds you well. We are writing to you to let you know about design changes which impact Mount Pleasant.

Since starting work on the A350 we have been working on making improvements to the design. We have been exploring options for improving the current access and egress into Mount Pleasant. Previously the design showed a separated access and egress arrangement on this road, with the new egress being located to the east of the Mount Pleasant access road. Unfortunately following early investigations we found that this proposal would not work, due to the constraints of the area and the existing utility services in place.

As such we have undertaken a re-design to improve the current access and ensure anyone accessing the road can do so safely in line with the new layout of the road.

We have provided the plan below which demonstrates the movement of the existing access further to the east along the A420 Bristol road. The movement of this access will provide additional visibility. Furthermore, the introduction of traffic signals on Bumpers Farm roundabout will provide a regulated flow of traffic on the A420, which in turn will allow longer opportunities to exit from Mount Pleasant.

We are also exploring opportunities to better the existing design for landscaping in the area to the front of Mount Pleasant.
