

## **ENVIRONMENTAL POLICY**

MJ Church is committed to preserving the environment and to minimising any adverse impacts associated with our business activities. This commitment requires the continuous improvement of our operational methods and working practices and to address any relevant environmental legislation changes to comply with relevant Environmental Legislation and the standards relevant to the areas of industry in which we work.

Based on a strong belief that construction related services can make a major contribution to a more sustainable world; MJ Church is committed to effective environmental management at all levels. With this approach we can positively influence employees, suppliers and customers to work towards a more sustainable approach to projects.

We shall work towards improving environmental management and a protection culture at all levels within MJ Church. Our systems shall be certified to ISO 14001. Through the education and engagement of our employees we shall ensure continuing awareness and understanding of the sensitivity of environmental issues.

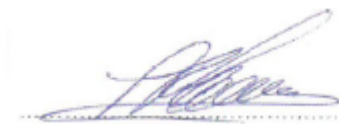

We commit to minimise our environmental impact by the efficient use of raw materials, water, energy and fuel. The waste management activities of the business shall seek to develop recycling and recovery outcomes for waste materials.

It is for every manager, employee and subcontractor working on behalf of MJ Church to promote and encourage compliance with this policy, to respond to all environmental issues and to suggest any possible improvements.

This policy shall be reviewed annually and amended or updated as required.

For & on behalf of MJ Church
